Introducing the Professional & Revolutionary **CHEWING GUM REMOVAL** system

A comfortable self contained backpack, worn by the operator allows for complete freedom of movement and ease of use for the removal of Gum, Oil, Rubber & Sticky labels.

These units are attached to an ergonomic lance designed specifically to ensure fast, reliable and easy operation with maximum chewing gum removal. There is a clever pump that injects 3ml per second of the solution into the lance which is the exact amount required to provide a constant source of vaporised solution. At the point of contact, our specially designed brush emits a PH Neutral and Safe steam mixture to evaporate the chewing gum, which can then be brushed away. The combination of pressure, heat and cleaning solution means that a wad of gum can be removed in just a matter of seconds - one cleaning operative can remove many pieces of gum per hour with no disruption to the public. This is more than double the efficiency of the best possible alternative product.

These machines eliminate the need for high pressure hoses, unfriendly chemicals and overspray into unwanted spaces, making them highly suitable to work in both populated and busy areas. The high quality and robust design of the Ecogum Maxi means it has a continuous operating cycle of a minimum eight hours, the Ecogum Midi has a continuous operating cycle of eight hours, and the Ecogum Mini has a shorter cycle of four hours.

MADE IN BRITAIN

🌿 Environmentally friendly

🌿 Simple & easy to use

🌿 Extremely portable

🌿 Long battery life

🌿 Hand held controller

🌿 Hard robust ABS outer casing

BENEFITS OF OUR TECHNOLOGY

- No water spray - So there's not gallons of water everywhere!
- No external power source required - So no trailing leads causing a tripping hazard or noisy generators.
- No blowing sand out of joints - So no rivers of sand or dislodged, uneven pavers.
- No need to barrier off areas for storage, everything is self-contained in the backpack.
- No damage to surfaces from power-washing.
- Completely silent - cleaning operations can be carried out at night.
- Portable and safe - cleaning can also be carried out during busy times, generating great positive PR and press coverage.
- Environmentally friendly - our unique cleaning solution is manufactured from renewable sources and is based on a sugar surfactant rather than oil based making it completely biodegradable.
- The cleaning lance has no moving parts - no servicing costs or replacement parts required.

MINI

Code: ERS20001

Ecogum Mini supplied with:

- Control unit on case
- 4 Hour battery life
- Battery charger
- Deck brush

MIDI

Code: ERS30001

Ecogum Midi supplied with:

- Handheld remote control unit
- 8 Hour battery life
- Battery charger
- Deck brush

MAXI

Code: ERS10001

Ecogum Maxi supplied with:

- Hard robust abs outer casing
- Hand held controller unit
- 8 Hour battery life
- QR code
- Hours indicator
- Deck brush
- Advertising opportunity on the unit while in use
