MULTI-PURPOSE TEMPERATURE AND FACE RECOGNITION STATION

New Upgrades

- **Infrared Temperature Measurement**
- **Face Recognition & Identity Confirmation**
- **Mask & Hard Hat Compliance Checks**
- **Hand Sanitiser Dispenser**

Keep your workplace safe and efficient with these multi-purpose face recognition stations. They will detect temperature abnormalities, confirm identities, check for non compliance and they are also available with an automatic hand sanitiser dispenser to help prevent the spread of germs.

Contact Central Cleaning Supplies to further customise this unique innovation to meet your needs.

Identify successfully

Face Recognition & Identity Confirmation

Ability to recognise existing staff, known contacts or unknown visitors accurately using face recognition in 0.2 seconds.

Face Database	20,000
Face Recognition Distance	0.2-0.5m
Face Verification Accuracy	≥99%
Camera Resolution	2 mega pixel

Sound & Light Alarm

Real-time sound and light alarm of temperature anomaly, dual authorisation of face recognition and temperature for access control.

8-inch HD Display

Simultaneously present the user's portrait, name and the temperature measurement data.

Infrared Temperature Measurement

Completes a temperature test within 0.1 seconds based on infrared thermal imaging technology.

| Measuring Accuracy	±0.3°C
Measuring Range	30°C-45°C
Measuring Environment	10°C-35°C (indoor windless environment)

Management Platform - Data Query

Supports data network upload function, which can:

- Form the temperature detection data into tables.
- Capture the users' real-time time and place.
- Push to email to the designated management personnel for tracking inquiry.

Hand Sanitising

Keep your staff and visitor safe upon entry with this touch free hand sanitiser dispenser.

LKS-TM001T

MULTI-PURPOSE TEMPERATURE AND FACE RECOGNITION STATION AND STAND

Product Code:
LKS-TM001A-X

MULTI-PURPOSE TEMPERATURE AND FACE RECOGNITION STATION CABINET

Product Code:
LKS-TM001X

NEW FEATURES

Real Time Temperature Display

Real time temperature gives the user confidence that the machine is fully functional while the subject is moving into position and gives them the confidence of accurate readings.

Face Alignment Marks

The introduction of on screen cues for the subject to align their face allows for more accurate measurement.

Customisable Health/Site Induction Questionnaire

A questionnaire can be loaded immediately after the face scan.

This can be tailored to any set of questions as specified by the user and can also be used in conjunction with the access control functions.

Low Temperature Setting

Low temperature setting can be adjusted to set temperature by site to ensure temperature detection on people working in cold environments or walking in from low outdoor temperature.

DISCLAIMER:
This product is not designed for the diagnosis, prevention, monitoring, treatment or alleviation of a disease, injury or disability. If this device gives an indication of high temperature you should immediately seek measurement with an appropriately registered medical device.

Australia Based Server Available

Ability to customise integration

Operating System	Android Standard	Storage Capacity	20,000 cards	Thermal Resolution	32 x 32 / 12 µm
Communication Mode	Wired / Wireless Network	RAM	2G	Max Infrared Image Size	≥320 x 240m; Error of ±0.3°
Chip	Quad code RK3288 ARM-A17 1.8GH, GPU: Mali-T764	ROM	8GB	Field of View	33° x 33°
		Working Humidity	<90%RH
